

11.18. Paddle Steamer Amazon with tube slide

The Amazon Paddle Steamer is a ten-metre paddle steamer complete with stainless steel slide, a helm and loving details such as a compass and hose telephone. Across three floors and in narrow corners and corridors, young adventurers can set out on exciting expeditions. Like all of our equipment at Ziegler Playgrounds, despite the paddle steamer's tricky routes and access points, the design was developed in accordance with the specifications of the European safety standard EN 1176.
