50.23.01. Wind in the Mill Combination

Our “Wind in the Mill” project resulted in a windmill – made from high-quality, durable robinia wood – that can be played in and on; with its deliberate “broken” design, it offers entirely new opportunities for play. For example, the upper part of the mill, which lies on its side, creates exciting places to climb and hide. The mill blades and wheel are climbable, stimulating little ones’ imaginations as well as their urge to get moving. This mill was inspired by a very special story. Do you have wishes and ideas of your own? We would be only too happy to help make them a reality!
